SUGGESTION AWARDS COMMITTEE SPECIAL PANEL OF THE
CLANDESTINE SERVICES MEETING, 24 January 1968

SUGGESTION NO. 68-102: dated 11 October 1967

25X1A

[REDACTED]
Exhibit Specialist
Support Services/OL/PSD

SUBJECT: Solar Still

A. Summary of Suggestion

The suggester proposed a survival solar still for the production of drinking water. The light-weight still might be used by personnel on escape and evasion missions. It might also be placed aboard aircraft in case of a forced landing in remote terrain. (See description and diagram attached).

B. Evaluation

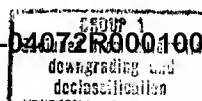

A proposal for a moisture condenser to obtain water for survival purposes was submitted to the [REDACTED] Technical Requirements Board during July 1960. After checking with TSD at that time, it was concluded that the expense for such a system could not be justified.

25X1A

C. Special Panel Recommendations

1. Not in line of duty.
2. Declined for Agency use. Forward to Department of the Air Force for possible value in their "Escape and Evasion" Program.
